- Completed structured courses in Data Structures And Algorithms, JavaScript, and Web Development.
- Participated in weekly coding contests, solving 100+ problems in JavaScript and Python.
- Completed intensive training in MongoDB, Express.js, React.js, and Node.js with real-world project implementations.
- Built full-stack web applications including a task manager, movie review app, and a mini e-commerce platform with user authentication and REST APIs.
- Gained hands-on experience in Git, GitHub, Postman, and deployment using Netlify and Render.
- Learned and implemented best practices in responsive design, API integration, and modern UI/UX principles using React and CSS frameworks.
- Collaborated with fellow learners in peer programming, code reviews, and group projects simulating real development environments.

## PROJECTS

**Mini Music Player.** Built a music player using **HTML, CSS, and JavaScript** with an interactive UI and multiple features:

- **Playlist Feature** – Users can create custom playlists and add songs.
- **Music Playback** – Songs play on click with seamless transitions.
- **Dark And Light Mode** – Theme switcher for a better user experience.
- **Genre Filtering** – Displays songs based on the selected genre.
